Why Choose Formpro Interiors

Advanced & high precision European standard machinery for panel processing and wood working

Maintaining delivery dates and no overshooting of budgets

Use of high quality branded raw materials and accessories

Providing aesthetic solutions in terms of finish and perfection

Customer Centric - Making customer dream interiors into reality

One year free service and warranty for material

▶ Factory - Insight :

PANEL SAW CUTTER

We are using panel saw cutters imported from Europe that specializes in cutting panels, angles, perfect squares and provides a precision and a perfect finish.

EDGEBAND MACHINE

To add on elegance to the finished doors, the edges are banded using the edge band machine to secure the edges of the doors. This machine also trims edges and ensures a complete processing option and marvelous finishing.

POSTFORMING MACHINE

Adding Lamination to the curved edge doors is manually not possible. So, we use the imported post forming machine to attain perfect finish for post forming doors and full round tops.

CNC ROUTER

Precise wood carving, grooving & jali cutting to obtain 2D & 3D models which are obtained through CAD/ ARTCAM softwares.
